This research examines relationships between individuals' perceived psychological safety and engagement in their work. Kahn (1990) effectively launched this stream with his qualitative studies, noted above, of conditions enabling people to personally engage or disengage at work. More recently, Kark & Carmeli (2009) examined the affective components of psychological safety and argued that ...

We argue that individuals monitor and evaluate attainment and maintenance goals differently. Attainment goals feature a salient current-end state discrepancy that is processed more than the corresponding match for maintenance goals. For maintenance goals, for which a salient discrepancy is absent, contextual influences on goal success/failure receive more processing than for attainment goals.

Mentorship is a relationship in which a more experienced or more knowledgeable person helps to guide a less experienced or less knowledgeable person. The mentor may be older or younger than the person being mentored, but he or she must have a certain area of expertise. It is a learning and development partnership between someone with vast experience and someone who wants to learn.

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.
