In physics or engineering education, a Fermi problem, Fermi quiz, Fermi question, Fermi estimate, or order estimation is an estimation problem designed to teach dimensional analysis or approximation, and such a problem is usually a back-of-the-envelope calculation. The estimation technique is named after physicist Enrico Fermi as he was known for his ability to make good approximate ...

Fermi problem - Wikipedia

Case problem SOURCES for these examples are shown here for the benefit of instructors, but normally sources are NOT given to students as that would defeat the purpose of PBL.

Problem-based Learning in Biology with 20 Case Examples

The problem with this solution is that it contains a race condition that can lead to a deadlock. Consider the following scenario: The consumer has just read the variable itemCount, noticed it's zero and is just about to move inside the if block.; Just before calling sleep, the consumer is interrupted and the producer is resumed.

Producer-consumer problem - Wikipedia

Text Structure Background. Text structure refers to how the information within a written text is organized. This strategy helps students understand that a text might present a main idea and details; a cause and then its effects; and/or different views of a topic.
