Did we all come from Adam and Eve like the Bible clearly states, or has the human species outgrown Adam and Eve? A recent article from The Economist covers the debate about whether all humans could have really come from just two people. It reports that at the November 2013 meeting of the Evangelical Theological Society in Baltimore, Maryland, a presentation about the latest in human genetics ...

A wide variety of foods can cause allergic reactions, but 90% of allergic responses to foods are caused by cow's milk, soy, eggs, wheat, peanuts, tree nuts, fish, and shellfish. Other food allergies, affecting less than 1 person per 10,000 population, may be considered "rare". The use of hydrolysed milk baby formula versus standard milk baby formula does not appear to change the risk.

History. Past thought on genetic factors influencing aggression tended to seek answers from chromosomal abnormalities. [citation needed] Specifically, four decades ago, the XYY genotype was (erroneously) believed by many to be correlated with aggression. In 1965 and 1966, researchers at the MRC Clinical & Population Cytogenetics Research Unit led by Dr. Court Brown at Western General Hospital ...

The only reason many people think these differences are major is because they've been brought up in a culture that has taught them to see the differences this way. Dr. Douglas C. Wallace, professor of molecular genetics at Emory University School of Medicine in Atlanta, stated, "The criteria that people use for race are based entirely on external features that we are programmed to ...

Population education is a recent innovation and, as such, is subject to various misinterpretations and misunderstandings. To many people, population education is family planning; to others, it is another name for sex education; still to many others, including teachers, it is synonymous with the teaching of demography and/or population studies.
