3. Dimension 1 SCIENTIFIC AND ENGINEERING PRACTICES. From its inception, one of the principal goals of science education has been to cultivate students' scientific habits of mind, develop their capability to engage in scientific inquiry, and teach them how to reason in a scientific context [1, 2]. There has always been a tension, however, between the emphasis that should be placed on ...

Argo is an international program that uses profiling floats to observe temperature, salinity, currents, and, recently, bio-optical properties in the Earth's oceans; it has been operational since the early 2000s. The real-time data it provides is used in climate and oceanographic research. A special research interest is to quantify the ocean heat content (OHC).

Background: Historically, nurses have relied on expert' opinions in clinical decision-making. However, these ways of practicing may not only be outdated but unsafe. Experienced-based knowledge may be associated with biased thinking that lead to errors. Objective: Assessment of nurses' perceptions, level of use and barriers on Evidence Based Practice.
