In Britain, manual alphabets were also in use for a number of purposes, such as secret communication, public speaking, or communication by deaf people. In 1648, John Bulwer described "Master Babington", a deaf man proficient in the use of a manual alphabet, "contrived on the joints of his fingers", whose wife could converse with him easily, even in the dark through the use of tactile signing.

In news media, echo chamber is a metaphorical description of a situation in which beliefs are amplified or reinforced by communication and repetition inside a closed system. By visiting an "echo chamber", people are able to seek out information which reinforces their existing views, potentially as an unconscious exercise of confirmation bias. This may increase political and social polarization ...

2.1. Practical considerations. One of the main practical considerations is the weight of the soft robotic glove. Aubin et al. determined that weight of such a device mounted on a hand should not exceed 0.5 kg. Any additional components of the system required for power, actuation or control can be distributed around the waist or the back and should weigh no more than 3 kg, which is the typical ...

1. Introduction. Stroke is the leading cause of disability worldwide (Lopez et al., 2006). The global burden of stroke reflecting the total number of stroke survivors and loss of disability-adjusted life years (DALY) is increasing, with most of the burden in low- and middle-income countries (Feigin et al., 2014). At the same time, the number of people that depend on assistance in their daily ...
