The terms Muslim world and Islamic world are controversial terms that commonly refer to the Islamic community (), consisting of all those who adhere to the religion of Islam, or to societies where Islam is practiced. In a modern geopolitical sense, these terms refer to countries where Islam is widespread, although there are no agreed criteria for inclusion.

The relationship between race and genetics is relevant to the controversy concerning race classification. In everyday life, many societies classify populations into groups based on phenotypical traits and impressions of probable geographic ancestry and cultural identity—these are the groups usually called "races" in countries like the United States, Brazil, and South Africa.

You missed the mark a bit there. You pointed out that, "Intelligence is not equal throughout the races. Examples of this are evident in the inventiveness of a particular group, what technologies they create, the societal structure they create, their art and their sciences", a statement which in and of itself is a contradiction.
