Nuclear Weapons Solutions

Accidents happen. They shouldn't lead to nuclear war. With the right policy shifts on nuclear weapons, terrorism, and related issues, we can ensure that good science helps keep the United States safe.

Nuclear Weapons | Union of Concerned Scientists

The State of Israel is widely believed to possess nuclear weapons. Current estimates put the size of the Israeli nuclear arsenal at between 80 and 400 nuclear warheads, and the country is believed to possess the ability to deliver them in a variety of methods including: aircraft; submarine-launched cruise missiles; and the Jericho series of intermediate to intercontinental range ballistic missiles.

Nuclear weapons and Israel - Wikipedia

A nuclear weapon (also called an atom bomb, nuke, atomic bomb, nuclear warhead, A-bomb, or nuclear bomb) is an explosive device that derives its destructive force from nuclear reactions, either fission (fission bomb) or from a combination of fission and fusion reactions (thermonuclear bomb). Both bomb types release large quantities of energy from relatively small amounts of matter.

Nuclear weapon - Wikipedia

Polls: Public opinion in EU host states firmly opposes nuclear weapons. A new YouGov poll commissioned by the International Campaign to Abolish Nuclear Weapons (ICAN) has found a stark rejection of nuclear weapons in the four EU states which host US nuclear weapons on their soil: Belgium, Germany, Italy and the Netherlands.

ICAN | International Campaign to Abolish Nuclear Weapons

What are conventional weapons? Weapon is used to mean an explosive weapon, such as a bomb, the warhead of a missile or an artillery shell. All such weapons contain explosive material which explodes when suitably triggered.

Nuclear and Conventional Weapons | Nuclear Darkness ...

Although the United States stopped producing new nuclear weapons over 20 years ago in the aftermath of the Cold War, the nuclear weapons complex (NWC), administered by the National Nuclear Security Administration (NNSA), is still a very active sector of the U.S. national security system.

Choose a city or location (type in an address) and select the size or type of nuclear weapon to be detonated. Depending on the weather conditions, the size of the certain and probable area of the nuclear firestorm, created by the nuclear explosion, will vary. The model used to approximate the size of the firestorm is accurate in the range of 10 to 20%.

Create a Nuclear Firestorm - Nuclear Weapons Explosion ...

TED Talk Subtitles and Transcript: Today nine nations collectively control more than 15,000 nuclear weapons, each hundreds of times more powerful than those dropped on Hiroshima and Nagasaki. We don't need more nuclear weapons; we need a new generation to face the unfinished challenge of disarmament started decades ago. Nuclear reformer Erika Gregory calls on today's rising leaders -- those ...

Erika Gregory: The world doesn't need more nuclear weapons ...

Nuclear Negligence examines safety weaknesses at U.S. nuclear weapon sites operated by corporate contractors. The Center's probe, based on contractor and government reports and officials involved in bomb-related work, revealed unpublicized accidents at nuclear weapons facilities, including some that caused avoidable radiation exposures.

The Naval Nuclear Propulsion Program (Naval Reactors), headquartered in the Washington Navy

Yard in Washington, DC, oversees the Naval Nuclear Laboratory, which has locations in Idaho, New York, Pennsylvania, and South Carolina. The lab provides militarily effective nuclear propulsion plants for U.S. Navy combatants and ensures their safe, reliable, and long-lived operation.

Locations | Department of Energy

NNSA scientists are able to accurately model nuclear weapons performance and physics without nuclear explosive testing. To accomplish this, NNSA conducts new scientific research and combines it with existing data from past nuclear tests, the nation's long history in nuclear science, and computer simulations.

Maintaining the Stockpile | Department of Energy

North Korea (or the Democratic People's Republic of Korea, DPRK) appears to be rapidly building a significant nuclear arsenal and the means to deliver those weapons. The DPRK can already deliver nuclear weapons by aircraft or ship and perhaps by theater ballistic missiles; it is now testing nuclear-capable missiles that could threaten targets across the Pacific Ocean, including the ...
