In biology, taxonomy (from Ancient Greek $\tau \alpha \xi \iota \zeta$ (), meaning 'arrangement', and - $\nu o \mu \iota \alpha$ (), meaning 'method') is the science of naming, defining (circumscribing) and classifying groups of biological organisms on the basis of shared characteristics. Organisms are grouped together into taxa (singular: taxon) and these groups are given a taxonomic rank; groups of a given rank can be ...

Botany, also called plant science(s), plant biology or phytology, is the science of plant life and a branch of biology. A botanist, plant scientist or phytologist is a scientist who specialises in this field. The term "botany" comes from the Ancient Greek word $\beta o \tau \dot{\alpha} v \eta$ (botane) meaning "pasture", "grass", or "fodder"; $\beta o \tau \dot{\alpha} v \eta$ is in turn derived from $\beta \dot{\alpha} o \kappa \epsilon v \nu$ (boskein), "to feed ...

Fingerprints have been extensively investigated from many points of view. Many detailed studies on their embryogenesis exist, numerous papers have been written on the inheritance of certain fingerprint features and they have been statistically linked to all kinds of common human features (gender) and some more obscure ones (sexual orientation, high blood pressure).
