Course Summary Biology 102: Basic Genetics has been evaluated and recommended for 3 semester hours and may be transferred to over 2,000 colleges and universities.

Biology 102: Basic Genetics Course - Study.com

Punctuated equilibrium (also called punctuated equilibria) is a theory in evolutionary biology which proposes that once species appear in the fossil record the population will become stable, showing little evolutionary change for most of its geological history. This state of little or no morphological change is called stasis. When significant evolutionary change occurs, the theory proposes that ...

Punctuated equilibrium - Wikipedia

In this activity, students apply concepts pertaining to the genetics of sickle cell disease and its relationship to malaria explored in the short film The Making of the Fittest: Natural Selection in Humans.. Students work through questions and problems in three sections: mendelian genetics and probability, pedigrees, and chi-square statistics.

Mendelian Genetics, Probability, Pedigree, and Chi-Square ...

We have updated the Lizard Evolution Virtual Lab based on feedback from field testers (over 50 classrooms!). The virtual lab includes four modules that investigate different concepts in evolutionary biology, including adaptation, convergent evolution, phylogenetic analysis, reproductive isolation, and speciation.
