ORA-12154: TNS Could not resolve the connect id ... - Oracle
I want to know the difference of those operators, mainly their performance difference. I have had a look at Difference between <> and != in SQL, it has no performance related information.. Then I found this on dba-oracle.com, it suggests that in 10.2 onwards the performance can be quite different.. I wonder why? does != always perform better then <>?. NOTE: Our tests, and performance on the ...

Background. The halting problem is a decision problem about properties of computer programs on a fixed Turing-complete model of computation, i.e., all programs that can be written in some given programming language that is general enough to be equivalent to a Turing machine. The problem is to determine, given a program and an input to the program, whether the program will eventually halt when ...
