For historical reasons, this is called a Unicode locale identifier. However, it really functions (with few exceptions) as a language identifier, and accesses language-based data.Except where it would be unclear, this document uses the term "locale" data loosely to encompass both types of data: for more information, see Section 3.10 Language and Locale IDs.

UTS #35: Unicode Locale Data Markup Language
Matrilineality is the tracing of kinship through the female line. It may also correlate with a social system in which each person is identified with their matriline – their mother's lineage – and which can involve the inheritance of property and/or titles. A matriline is a line of descent from a female ancestor to a descendant (of either sex) in which the individuals in all intervening ...
