Extreme Programming Explained: Embrace Change, 2nd Edition ...

Logic programming is a type of programming paradigm which is largely based on formal logic.Any program written in a logic programming language is a set of sentences in logical form, expressing facts and rules about some problem domain. Major logic programming language families include Prolog, answer set programming (ASP) and Datalog.In all of these languages, rules are written in the form of ...

Logic programming - Wikipedia

Extreme programming (XP) is a software development methodology which is intended to improve software quality and responsiveness to changing customer requirements. As a type of agile software development, it advocates frequent "releases" in short development cycles, which is intended to improve productivity and introduce checkpoints at which new customer requirements can be adopted.

Extreme programming - Wikipedia

The important point about the example is that the Service Layer uses both operation scripting and domain object classes in coordinating the transactional response of the operation. The calculateRevenueRecognitions method scripts the application logic of the response required by the application's use cases, but it delegates to the domain object classes for domain logic.
