No Code Solutions In Sharepoint

There's a new wizard based, easy user interface for column conditional formatting in SharePoint Online!! That means you don't have to know JSON code in order to do some conditional formatting on your columns!!!!! This doesn't work on every column type, there are still limitations, but it does give some basic options. Right now this...

No Code Column Formatting in SharePoint – NEW | @WonderLaura

A popular feature of web pages is the use of "named anchors" – which comprise a special type of url that takes a user to a specific section of a page, and an "anchor" that identifies that location.

Business Processes and Workflow Automation Software

I'm adding this here in the hope it may save someone a few hours of pain and hair-pulling. (i.e., what I've just been through.) If you use solution management in Central Administration in SharePoint – you'll be fairly used to the whole add-spsolution / install-spsolution / uninstall-spsolution / remove-spsolution stuff that you either run from Powershell or the GUI.

Host your SharePoint sites cost effectively. Pay-as-you-go pricing and per-minute billing from Azure helps you save money. For development and testing, take advantage of Azure benefits for Visual Studio subscribers to reduce software licensing costs. When testing, spin up additional servers as needed for scale and load testing over short periods of time and remove them when you're finished.
