1. Introduction. Lithium-based rechargeable batteries with high energy density play an important role in many applications including electric vehicles, grid-level energy storage, and communications [].Among various electrode materials lithium metal anode is highly attractive as it offers ten times the specific capacity (3860 mAh g -1) as that of the state-of-the-art graphite anode (372 mAh g ...

The disturbance of the downstream wind current is why regular turbines need to be installed far from each other. This doesn't affect bladeless wind turbines, any limitation associated with the "wake effect" is avoided. Furthermore, we expect Vortex devices to work better together, feedbacking each other if they have the proper free space around them, which is estimated to be half of the ...
