Problem And Solution Scenarios For

The trolley problem is a specific ethical thought experiment among several that highlights the difference between deontological and consequentialist ethical systems. The central question that these dilemmas bring to light is on whether or not it is right to actively inhibit the utility of an individual if doing so produces a greater utility for other individuals.

The best products are built on a vivid, actionable, testable view of the customer. Personas will help you focus and integrate needfinding, design, & growth.

Personas for Design, Development, & Growth - Alex Cowan

The principal–agent problem, in political science and economics (also known as agency dilemma or the agency problem) occurs when one person or entity (the "agent"), is able to make decisions and/or take actions on behalf of, or that impact, another person or entity: the "principal". This dilemma exists in circumstances where agents are motivated to act in their own best interests, which are ...

This is my first scenario here, my friend who asked for this scenario, if you are sensitive about this subject please read another scenario, anyway it is not my intention to offend someone…Sorry for the low number of characters

Yandere anime boys scenarios
Last November I have solved Problem 15 of Project Euler (a counting problem involving paths in square grids), and, although the problem admits a simple solution, some of the solutions presented in their forums are very complicated. Thus, I thought it would be a good idea to present my solution, as I consider it very simple. Problem statement. Starting in the top left corner of a $2{\times}2$ ...

A square grid path problem | João F. Ferreira
Some common confusion I've come across recently involves the difference between a Scenario and Acceptance Criteria. I'll start by defining these two things as I understand them. A scenario is an example of the system's behavior from one or more users' perspectives. Acceptance criteria are a set of rules which cover aspects of a system's…

Acceptance Criteria vs. Scenarios | Liz Keogh, lunivore
