1 Introduction. sed is a stream editor. A stream editor is used to perform basic text transformations on an input stream (a file or input from a pipeline). While in some ways similar to an editor which permits scripted edits (such as ed), sed works by making only one pass over the input(s), and is consequently more efficient. But it is sed's ability to filter text in a pipeline which ...

The subreddit for the C programming language. The network is just a nonlinear function estimator.A simple polynomial regression will perform exactly the same way better, and is a lot easier with such low-dimensional input. This is a neat showcase of how these networks can actually estimate any function depending on the data you throw in there, though.
