A two-person game has two players.A game in which one player wins what the other player loses is called a zero-sum game. The theory of two-person zero-sum games is the foundation of more complicated games, such as games with more than two players (n-person games), and games in which the players can benefit through cooperation, with or without collusion, side payments, or binding agreements.

In physics, the Lorentz transformations are a one-parameter family of linear transformations from a coordinate frame in spacetime to another frame that moves at a constant velocity, the parameter, relative to the former. The transformations are named after the Dutch physicist Hendrik Lorentz.The respective inverse transformation is then parametrized by the negative of this velocity.
