The overarching goal of higher education at large is to adequately prepare students to achieve success in their future careers. While facing a certain level of academic rigor and gaining important life skills can be considered crucial aspects of career preparedness that students receive while in college, more and more importance is being placed on the value of experiential learning.

The importance of internships: How students & employers ...
This article is an update to this old article, which had an ugly demo and a variety of techniques in it no longer probably considered good practices.This new demo is much cleaner, up to date, and fuller featured. Because the old article was a bit of a different scope, I'll leave it alone, just refer to this one.

There's been a lot of talk recently about whether or not you need a degree to be in tech (spoiler: you don't). But please don't take this to mean you don't need any kind of education to be in tech, because by not getting a degree, you're opting to replace the imposed learning structure of an academy with learning on your own.
