We calculated descriptive statistics on case studies and meta-analyses; for case studies, we conducted bivariate analysis. Specifically, we performed the log likelihood ratio (G-test) test of independence with Williams' correction (to account for small sample size) in order to assess any significant relationships between the case study properties with nominal variables and the four outcome ...

Misc thoughts, memories, proto-essays, musings, etc. The most recent SEP entry on logical empiricism really reinforces how much America benefited from WWII and the diaspora of logicians, mathematicians, philosophers and geniuses of every stripe from Europe (something I've remarked on while reading academic biographies). You can trace back so much in just computing alone to all of their work!
